Profile

Game Developer and Computer Engineering graduate with strong experience in Unity, Unreal Engine, and C# gameplay programming. Skilled in game mechanics, VR development, AI systems, and interactive environments. Experienced in building complete game prototypes, AR applications, and immersive simulations. Passionate about creating engaging gameplay experiences and technically robust game systems.

Professional Experience

Virtual Reality Developer Intern, 08/2024 – 09/2024
National Academy of Information Technology for Persons with Disabilities (NAID)
Developed VR social training simulations in Unity, creating immersive scenarios for autistic users to practice real-world interactions. Implemented interactivity with C# and XR tools, focusing on accessibility and user-centered design.

Full Stack Developer Intern, *World Health Organization (WHO)* 07/2024 – 09/2024
Built a banking teller queue system with C# (.NET) and Angular, enabling real-time updates. Applied Clean Architecture and collaborated in a cross-functional team.

Education

Bachelor of Science in Computer Engineering, 10/2020 – 07/2025
Arab Academy for Science, Technology and Maritime Transport Cairo, Egypt
GPA: 3.5

Scholarship in Game Development, *Information Technology Institute (ITI)* 10/2025 – 08/2026
9-month scholarship intensive Game Programming track focused on gameplay systems and engine architecture. Built multiple prototypes in Unity and Unreal using C# and C++, applying OOP, AI, physics, and graphics concepts. Developed VR/AR/MR projects while practicing Agile workflows and teamwork. Smart Village, Giza

Technical Skills

Programming Languages
C# • C++ • C • Java • Python • Dart • Kotlin

Graphics Programming
OpenGL • 3D Graphics Concepts

Web Development
HTML

Game Development
Unity Engine • Unreal Engine • Game AI • SFML • VR/AR Development

Tools & Technologies
Blender • Git • Flutter • Angular • .NET

Databases
MySQL • R Language

Projects

From the River to the Sea, *Egypt Game Jam 2026 Submission* 02/2026 – 02/2026
Co-developed a 3D narrative walking simulator in Unity, exploring identity and conflict. Designed immersive storytelling, dialogue, and choice-driven progression.

Attaba Syndrome, *ITI Mini-Game Jam Submission* 12/2025 – 12/2025
Co-developed a fast-paced 2D platformer in SFML, focusing on spatialized audio, dynamic sound cues, and event-driven gameplay. Implemented physics, obstacles, and responsive controls.

Historealm – AR Tourist Companion App, *Senior Project* 11/2024 – 06/2025
Developed an AR application combining Unity and Flutter. Created interactive Ancient Egyptian historical characters in 3D. Integrated AI conversation systems using LangChain, Chroma, OpenAI API. Implemented speech recognition (Whisper) and voice synthesis (ElevenLabs). Designed immersive AR storytelling experiences for educational tourism.

Kaya's Adventure – 3rd Person Unity Game 01/2024 – 01/2024
Built a third-person adventure game using Unity and C#. Implemented player movement, puzzles, and environment interaction systems. Designed level challenges within a stylized 3D environment.

Red Light, Green Light – Unity Gameplay Prototype 12/2023 – 12/2023
Developed a third-person challenge game inspired by Squid Game mechanics. Implemented AI detection systems and player state management.

Awards

ITI Mini-Game Jam (1st Place), *Information Technology Institute* 01/11/2025

NAID Best Project 2024, 01/08/2024
National Academy of Information Technology for Persons with Disabilities (NAID)
